Project Works

Pizza Sales Analyses

- Tool: Python
- Libraries: Pandas, Matplotlib, Seaborn
- Duration: 4.5 hrs

Responsibilities: Analyzed pizza sales data using Python, cleaning and preprocessing with Pandas. Employed Matplotlib and Seaborn for visual representation. Collaborated cross-functionally and delivered insights efficiently within a 4.5-hour timeframe.

Restaurant Sales Analyses Dashboard

- Tool: Excel (Key Highlights: Measures, Pivot Tables, Charts)
- Duration: 9 hrs

Responsibilities: Created a dynamic Restaurant Sales Analyses Dashboard in Excel, utilizing advanced functions such as Measures, Pivot Tables, and Charts. Condensed complex data into visually appealing and insightful representations. Completed the project efficiently within a 9-hour timeframe, demonstrating proficiency in Excel and a keen eye for data visualization.

Maven Market Dashboard

- Tool: PowerBI (Key Highlights: PowerQuery, Measures, Charts)
- Duration: 6 hrs

Responsibilities: Led end-to-end development of Maven Market Dashboard in PowerBI, encompassing data transformation, cleaning, and modelling. Achieved seamless visualization and interlinking across multipage dashboards. Completed the project efficiently within a 6-hour timeframe, showcasing expertise in PowerBI and comprehensive data management skills.
